

CSS GRID SYSTEM CHEAT SHEET

These tables provide a quick at-a-glance view of the grid-unit/pixel equivalent for each grid configuration. Just make sure you're looking at the correct table – the values are different for each configuration. If you're using the freeform grid, there's a chart for you to enter your column widths for future reference. Refer to the PDF user guide and also the inline help in the "Grid" tab in the Citizen Press options page for more info on the grid.

12-60-20-960 Configuration (Default)	
Max grid units: 12 // Gutter width: 20px // Overall site width: 960px	
# Grid Units	Pixel Equivalent
1	60px
2	140px
3	220px
4	300px
5	380px
6	460px
7	540px
8	620px
9	700px
10	780px
11	860px
12 (full-width column)	940px
