

1. e-mail Subscription Settings:-

Find subscription.php in the theme folder, open it with your text editor, look for "<a class='mail-feed' href='http://www.feedburner.com/fb/a/emailverifySubmit?feedId=XXXXXX'". And replace XXXXXX with your Feedburner feed ID.

*Find your Feedburner feed ID: Publicize → Email Subscriptions → Preview Subscription Link... (Subscribe to xxx by Email)

2. Advertisement:-

Find **advert-content-125.php**, **sidebar-300x25-Ad.php**, **header-ad-728x90.php** in the **theme folder**, open it with your text editor and replace all the default ad code with your desired ad code within every

3. Custom Image Display:-

For custom image display in **fresh post & other home page posts**.

- Find **Add new custom field**: (beneath the post writing box)
- Type "image" in Name field and enter the uploaded photo value (should look like /wp-content/uploads/2009/02/wpinvoice.jpg)
- Add click "Add Custom Field" button.

4. Twitter Configuration:-

Find header.php in your Leafy theme folder, open it with your text editor, locate the following Javascript code and replace **username** with yours

```
<script type='text/javascript'>
$(document).ready(function() {
    $(".tweet").tweet({
        join_text: "auto",
        username: "espresor" //REPLACE WITH YOUR TWITTER USERNAME
        avatar_size: 24,
        count: 5, //NO. OF TWITTER UPDATES YOU WANT SHOW
        auto_join_text_default: "I said,",
        auto_join_text_ed: "I",
        auto_join_text_ing: "I was",
        auto_join_text_reply: "I replied to",
        auto_join_text_url: "I was checking out"
    });
});
</script>
```
