

Eyeshot theme is permitted for use under GPU license v3.0.

Eyeshot theme is useful for small to medium businesses who want a single page website to launch in quick time.

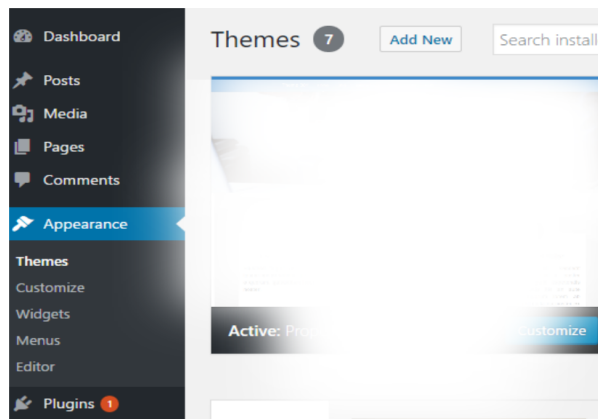

Eyeshot is a responsive web design that should support breakpoints 980px 768px, 640px, 480px, 360px and 320px. It is tested on Google Chrome v57, Mozilla Firefox v53, Opera v42, Safari v5.1, Internet Explorer 11 and Microsoft Edge.

Installation

Theme Installation

Follow the steps below to install via WordPress.

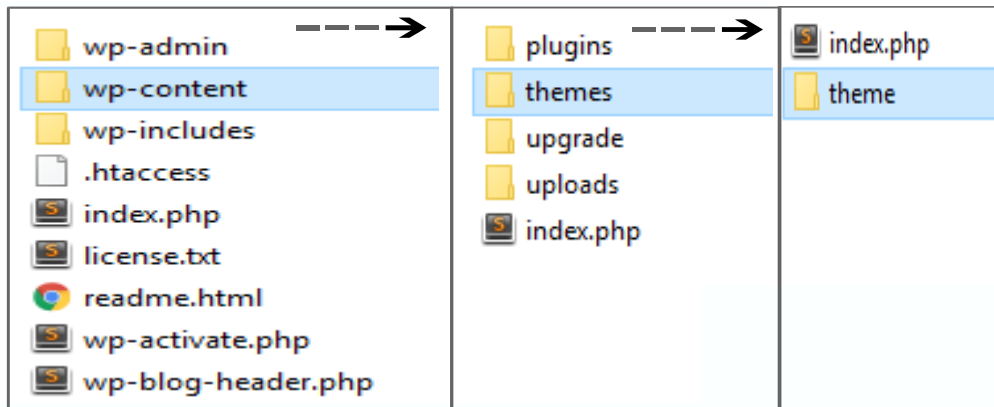

1. Navigate to Appearance -> Themes
1. Click 'Add New' and hit the 'Upload Theme' button
2. Navigate to find the "**Theme.zip**" file on your computer and click "Install Now".
3. Once uploaded, activate the theme. Go to Appearance -> Themes and activate it.
4. If you see a notification message to change permalink setting to post name. Please do this.

FTP Installation

Follow the steps below to install via FTP.

1. Log into your hosting space via an FTP software
1. Unzip the "**Theme.zip**" file and **ONLY** use the extracted "**Theme.zip**" theme folder
2. Upload the extracted "**Theme**" theme folder into **wp-content -> themes** folder
3. Activate the newly installed theme. Go to **Appearance -> Themes** and activate it.
4. If you see a notification message to change permalink setting to post name. Please do this.

For more detail, Please check [Theme Installation Guide](#) on WordPress Codex

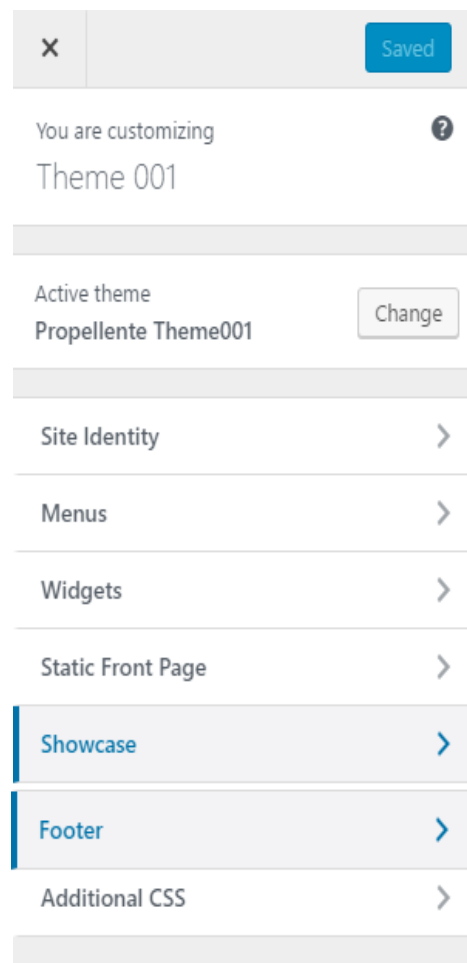

Theme Settings

Theme Options

You can customize site layout and settings by configuring theme options. To begin configuring theme options, go to **Appearance > Theme Options**.

The customizable options are

- Showcase
- Footer

Showcase Settings Tab

Showcase settings tab allows you to manage logo, favicon, copyright text on footer, your email address and phone number

- Logo - You can upload and set site logo.
- Showcase Image - You can upload the image for banner.
- Banner Heading - You can manage welcome text on the banner.
- Banner Text – You can manage welcome text below the heading on the banner.
- Button Text – You can manage text below the text on the banner.
- Banner Button URL – You can manage URL for the button on the banner.
- Feature Title – You can manage title of the section #feature
- Grid Title - You can manage title of the section #gridcontainer
- List Title - You can manage title of the section #listcontainer
- About Title - You can manage title of the section #about-us

Footer Settings Tab

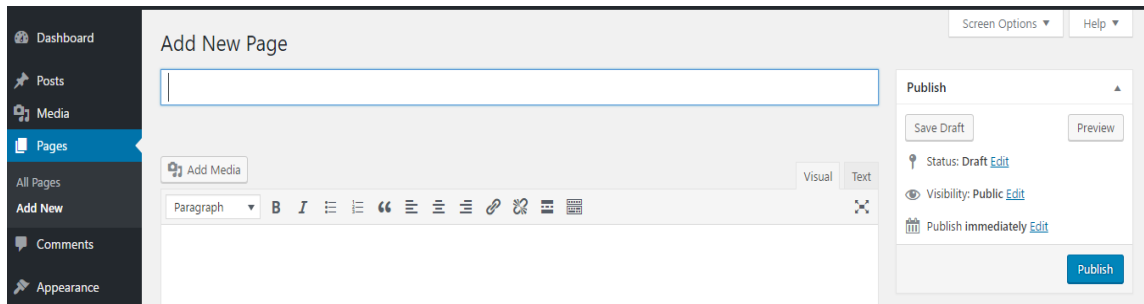

- Footer Text - You can manage text “designed by” for the footer section
- Footer URL - You can manage URL for the footer section

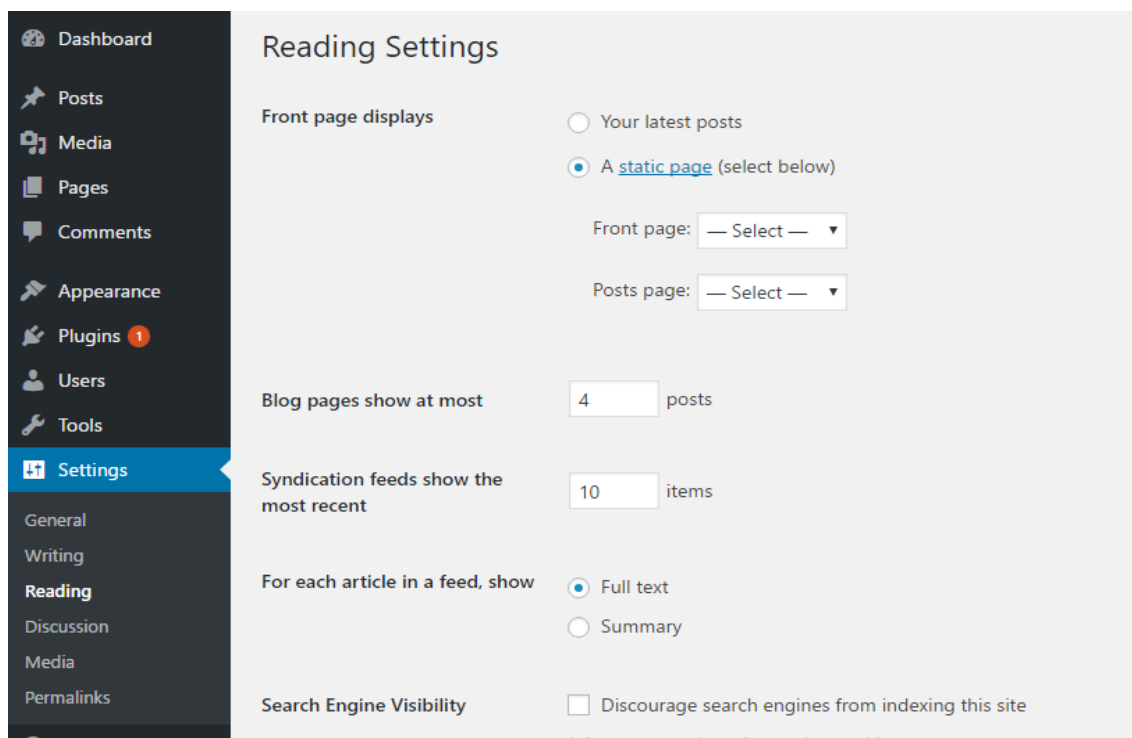

Managing Theme

- Page :

Go to **Pages** -> **Add new** Page from the Dashboard, Give a title to the page and **Publish** the page.

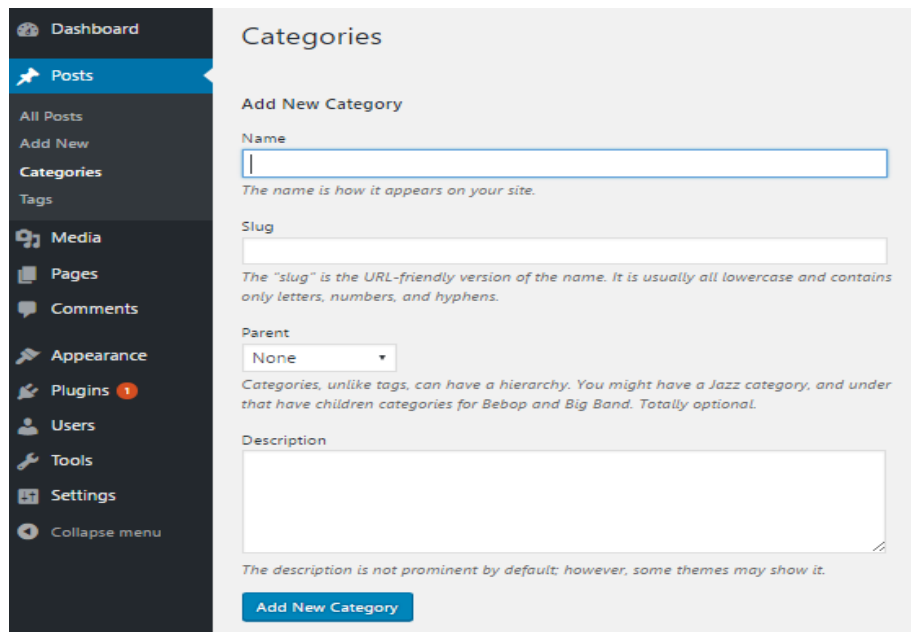

Go to **Settings** -> **Reading** -> select the page in the options for **Front Page**, and save your changes.

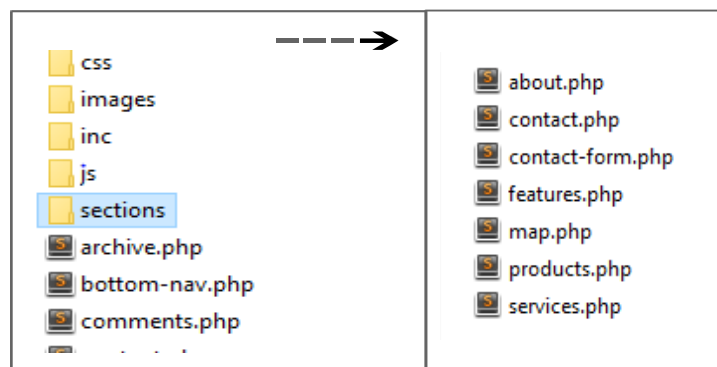

- Posts:

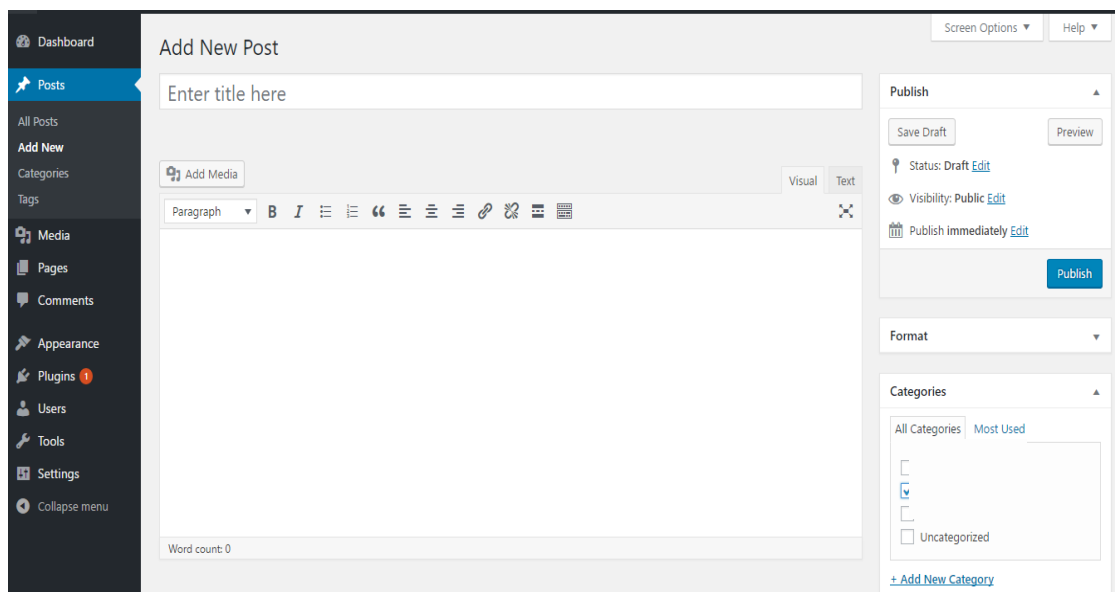

Go to **Posts** -> **Categories** -> Give a name for the category and **Add Category**.

In this theme we are using Products, Services, About Us. You can give your specific post categories and you need to call them in the respective PHP files in the **sections** folder within **wp-content -> themes** folder

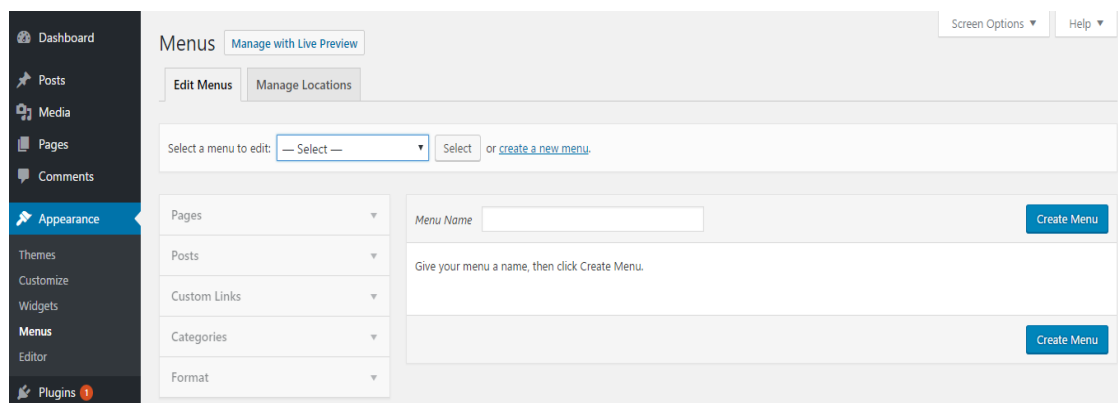

Go to **Posts -> Add New Post**, give a title and contents to the post and select the **Category** for the post and **Publish** the post.

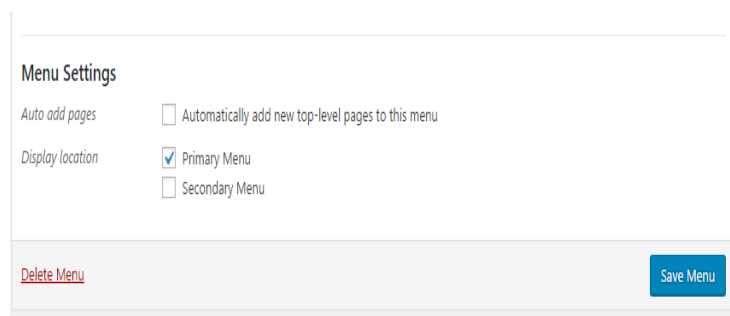

- Menu

Go to **Appearance -> Menus**, create a menu

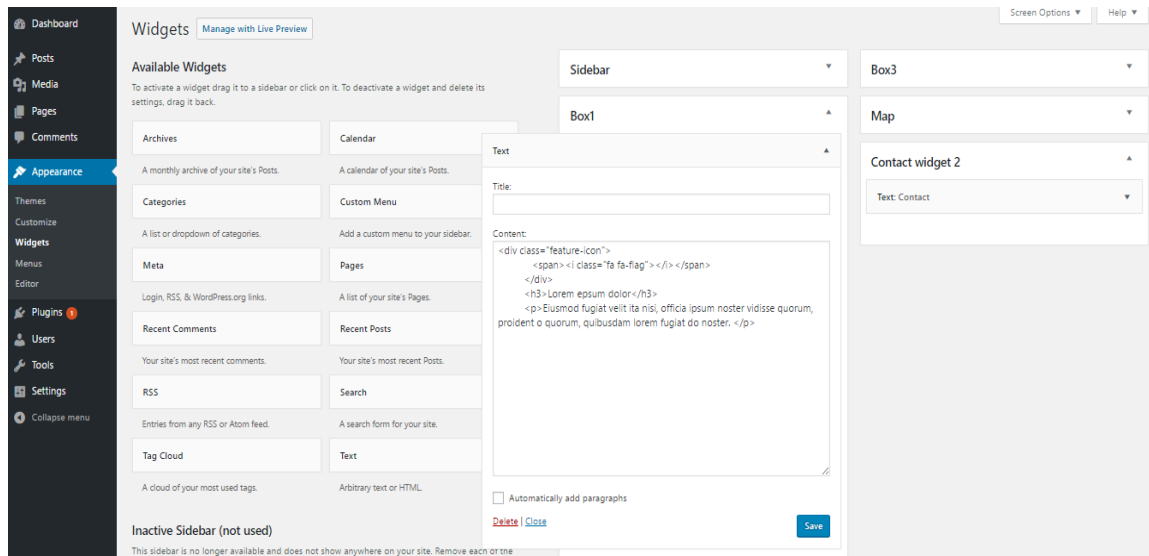

make the menu as a **Primary Menu** and **Save**.

- Feature Box

Go to **Appearance -> Widgets**, you can change the content for feature box here in **Box1, Box2, Box3**.

The sample data is as follows:

```
<div class="feature-icon">
<span><i class="fa fa-bell-o"></i></span>
</div>
<h3>Lorem ipsum dolor</h3>
<p>Voluptate minim id senserit comprehenderit. Nostrud a noster proident ad ut
legam expetendis comprehenderit. Duis hic an aute litteris, aliquip quorum lorem absummis. Et dui
si nulla eanoster ex litteris.</p>
```

You can change to your map in the **Map** widget.

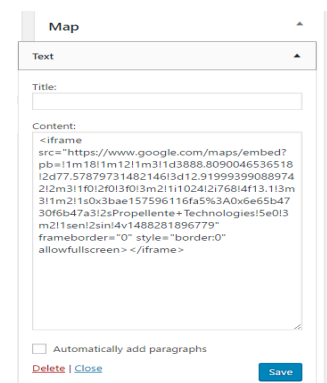

The sample data is as follows:

```
<iframe src="https://www.google.com/maps/embed?pb=!1m18!1m12!1m3!1d3888.8090046536518!2d77.57879731482146!3d12.919993990889742!2m3!1f0!2f0!3f0!3m2!1i1024!2i768!4f13.1!3m3!1m2!6116fa5%3A0x6e65b4730f6b47a3!2sPropellente+Technologies!5e0!3m2!1sen!2sin!4v1490184131186" width="800" height="600" frameborder="0" style="border:0" allowfullscreen></iframe>
```

You can change to your contact details in the **Contact Widget 2** widget.

The sample data is as follows:

```
<ul>
<li>Email : youremail@mail.com </li>
```

```
<li>Phone : +00 000 000</li>
<li>Fax : 58585858</li>
<li><h3>Address</h3></li>
<li> 18/J, 5th Main, 40th Cross, 5th Block, Jayanagar,
Bengaluru, India - 560041.</li>
</ul>
```

Contact widget 2

Text: Contact

Title:

Contact

Content:

```
<ul>
<li>Email : youremail@mail.com </li>
<li>Phone : +00 000 000</li>
<li>Fax : 58585858</li>
<li><h3>Address</h3></li>
<li> 18/J, 5th Main, 40th Cross, 5th Block,
Jayanagar, Bengaluru, India - 560041.</li>
</ul>
```

Product slide data
